

WaveAssist

...

InnoWave's new AI-powered augmentative collaboration solution

Who is FutureLogic?

Consultancy specialised in creating **digital transformation**

Broad cross-sector experience in delivering AI-enabled change including:

- Analysing strategic drivers
- Opportunity identification
- AI enabled solutions
- People first augmentation
- Value creation

Who is InnoWave Global?

- Headquartered in London
- 25,000 employees globally

Primary markets:

- Europe
- Asia
- North America.

Services:

- Multi-sector consultancy
- Digital transformation
- Technologically enabled solutions

Meet John, the Innovation Strategist

John
Innovation Strategist
6 years at InnoWave

*"I spend more time
hunting for
information and files
compared to creating
them"*

Daily Challenges:

Duplicated work

- Repeats work done in other regions.

Fragmented knowledge

- 15 hours a week spent on searching for existing knowledge and files.

Limited collaboration

- No transparency into global innovation projects.

Limited innovation time

- Admin issues wasting creative innovation time.

Daily Issues faced by Innovation Strategists

- Increased **fragmentation** and **friction** between departments.
- Regional offices often operate with their own processes and digital tools.
- Teams **struggle to collaborate**.
- Language barriers.
- Service and methods are **inconsistent** between departments.

Solution Proposal - Introducing **WaveAssist**

- **The platform:** A single, secure digital workplace replacing **InnoWave's** fragmented regional tools.
- **The engine:** An integrated 'always-on' AI assistant embedded directly into every workflow: **InnoBot**.
- **The brain:** Unlike public AI's, **InnoBot** is securely trained on **InnoWave's** internal database to leverage the 25k employee knowledge base.
- **The function:** Seamlessly combining file sharing, live communication, and knowledge retrieval in one window.

The result:

InnoWave Global - WaveAssist

☐	 Executive_Summary_Q3.docx		Modified: Oct 21, 11:30 AM	 David L.	1.2MB	

The Architecture:

Strategic alignment - Scale into speed

Augmentation: Removes administrative lags such as manual file searching, to maximise high-value creative time, and auto translates documents.

Leveraging 25k advantage: Unlocks the global knowledge base, combining startup speed with incumbent resources

Augmenting the workflow

Intelligent retrieval: Replaces manual file hunting with natural language queries, for instant location and summarisation.

Global collaboration: Live-translates documents and chats, removing language barriers enabling instant regional feedback.

Creative sparring: Provides private sandbox for innovation strategists to brainstorm & stress-test concepts against internal company data.

Automated admin: Automatically records and summarises meetings, shifting focus from administration to core value creation.

Benefit Tree

How John can use the Features

The file-sharing feature strengthens InnoWave's digital transformation by connecting teams, reducing duplication, and making expertise accessible across regions.

The AI collaboration feature accelerates idea exploration and concept development for Innovation Strategists while keeping human creativity central.

The screenshot displays the InnoWave application interface. On the left is a sidebar with navigation options: InnoWave, Direct Messages (showing John (Innovation Strategist) and InnoBot), Channels, and Integrations. The main area shows a direct message conversation with InnoBot. At the top, it says 'Direct Message: John (Innovation Strategist) & InnoBot'. Below this is a search bar and a button that says 'Analyze these market signals for the new sustainable tech prototype.' The message from InnoBot provides market signals for a sustainable tech prototype, including strong demand for eco-friendly solutions, positive regulatory outlook, competitive landscape shift, and investor interest on the rise. It also includes a data visualization titled 'Market Trend (Last Quarter)' showing an upward trend in market demand over four quarters (Q1 to Q4).

Direct Message: John (Innovation Strategist) & InnoBot

John

Analyze these market signals for the new sustainable tech prototype.

10:45 AM

InnoBot

Based on recent analysis, here are the key market signals for the sustainable tech prototype:

- **Strong Demand for Eco-Friendly Solutions:** 75% growth in consumer interest for renewable energy technologies over the last quarter.
- **Positive Regulatory Outlook:** New government incentives and policy support favoring carbon-neutral initiatives, creating favorable market conditions.
- **Competitive Landscape Shift:** Major industry players are increasingly investing in green technologies, indicating a competitive advantage for early adopters.
- **Investor Interest on the Rise:** Significant increase in venture capital funding for sustainable tech startups, showing strong market confidence.

Here is a concise data visualization illustrating the upward trend in market demand:

Market Trend (Last Quarter)

65% Market Growth Trend

Message InnoBot...

Not just for Innovation Strategists

While the Innovation Strategist acts as the catalyst, InnoBot serves as the connective tissue for the entire enterprise. It unifies the workforce by allowing cross-functional teams—from engineering to HR—to collaborate on the same secure data in real-time.
