CCG

Avondale

Bridge

OPTION "B"

Final deal for 2026:

GM	5500	£	1154
GS	4600	£	1400
(PHA)	600	£	775

General

Appearance? formal informal Names? given not given

Introduction, Objectives & Approach? As before.

Again, straight into a previous offer.

[2nd]

Communication of Changes? Nothing here. No explicit outline of a desire to buy more episodes, so the hospital never really proposes anything new or innovative.

Negotiating skills – signalling, proposing, listening, clarifying, trading, persuading

Micro-negotiating over prices. The way to get lower prices is to offer more episodes. You try this abit...

Finally, you try to develop the GM deal. Avondale does nothing to help you develop this, other than respond to your questions and offers. Keep going! [2nd] Minor tweaks here. You put a few

Dealing with time or conflict

Move GM on the deal but GS and PHA

Close at the end.

Stay the same (I think)

Teamwork and meeting skills

Good. Slowing down towards

Use of model/data the end.

Technical aspects of prices and/or services

GM	5450	@	£	1175
GS	4500	@	£	1405
(PHA)	500	@	£	780

- GM is developed - by you not Avondale

GM	5400	@	£	
GS		@	£	
(PHA)		@	£	

[2nd] You are slower here. Running out of energy?

GM		@	£	
GS		@	£	
(PHA)		@	£	

General

Not much really changes. GM bounces up to 5700 but then springs back down to 5500, which is very close to what you came in with.

DELAYED START [9:10 am] ONLY ONE CCG, AND ONE BRIDGE

Game: II

Avondale

Final deal for 2026:

CCG → Bridge

GM	2100	£	1470
GS	3700	£	1028
(PHA)	300	£	870

General

Appearance? formal informal Names? given not given

Introduction, Objectives & Approach?

Good, if general, v/b. Schedule described.

[2nd] The hospital is subsidising .. that is why the prices are always moving round and round ...

Communication of Changes? Nothing yet.

[2nd] You mix together GS pricing, GM pricing and PHA - does it all have to be mixed together like this? Surely there is a simpler way.

Negotiating skills - signalling, proposing, listening, clarifying, trading, persuading

CCG doing all the work here. Bridge purely reactive.

You will need to continue to shape this, as Bridge are not doing any negotiation, or coming up with any idea or proposals.

Bridge claim they can open a new GS ward and do PHA - this would require two new wards - do they have 2 new wards?

Dealing with time or conflict

Close at the end.

Teamwork and meeting skills

Good, again.

Use of model/data

Solid but

[2nd] Bridge offer fewer GM (very odd) but is this in Grossbay's interest?

It means the GM provision near Bridge hospital is worse than last year. You

seem to be just chasing prices and missing the clinical and geographical issues.

Technical aspects of prices and/or services

GM	2100	@	£ 1473
GS	3300	@	£ 1111
(PHA)	—	@	£

GM	2300	@	£ 1400
GS	3700	@	£ 1028
(PHA)	300	@	£ 880

[2nd]

GM	2100	@	£ 1473
GS	3700	@	£ 1028
(PHA)	300	@	£ 880

General

Bridge is passive, confusing and unhelpful. You will need to drive this forward, as Bridge are never going to do this.

Good attempt to do this ... but you need to tie this down to some concrete numbers, eventually.

- "new word", no HuddleTech

Interesting attempt to trade PHA for core prices but eventually you need to lock some prices down. Everything is just moving round and round ... (ie. subsidising)

If they open a new GS ward and a new PHA ward, then they would need 2 new words - do they have 2 new words? Final offer comes in. About time.

Avondale

Final deal for 2026:

CCG

Bridge

GM

£

GS

£

(PHA)

£

General

Appearance? formal informal Names? given not given

Introduction, Objectives & Approach?

Read us to CCG. Straight into a previous deal. Develop the deal?
Can you get more GM? More GS? You are shrinking in GS. This never comes

Communication of Changes? Nothing here. Now it comes. Can you build this into a new - better - proposal. "makes no difference". Goes nowhere.

[2nd] - You only try to develop the deal right at the end, when it is too close to the end.

Negotiating skills - signalling, proposing, listening, clarifying, trading, persuading

Micro-negotiating on GM price: £1 Your issue is episodes not prices. You should try to get more episodes, to bring the price down. Now the CCG offers more GS, not you.

"We can do 600 PHA" - and a price? But more episodes don't help... So you sound like you don't want them. Poor. 600 is clearly better than 500. Again, you micro-negotiate on a previous deal.

Dealing with time or conflict

Finally, you try more GM - keep going! It took you a long time but finally the deal is improving... but now back to price negotiating over a few pounds.

Teamwork and meeting skills

Use of model/data

All the energy and ideas come from the CCG, not you.

Technical aspects of prices and/or services

GM	5500	@	£ 1168
GS	4500	@	£ 1405
(PHA)	500	@	£ 780

- this is the only one that has changed (+50 episodes)

- still low
- not 600

Your demeanour is one of reluctance and unhelpfulness. Where is your energy and drive?

GM	5400	@	£
GS		@	£
(PHA)		@	£

Finally... you try ^{to get} some GS... but your proposal is confusing and goes nowhere.

GM	5500	@	£
GS	4600	@	£ 1400
(PHA)	600	@	£ 775

[2nd] Now ^{CCG} drop GM to 5400... This is worse than before. "honour the written proposal"

General

"550" - you mean "5550"

Very little change to a previous deal. Only GM improves a bit (+50). The CCG has a lot more money to spend, yet you don't find this out, or try to get more episodes. Have you 'settled'? You need more ambition, more ideas, and more flexibility.

DELAYED START: 9:10 ONLY ONE PERSON HERE: ALEX NOW ALL HERE

Game: ||

Avondale

Final deal for 2026:

CCG

Bridge

GM	£
GS	£
(PHA)	£

General

Appearance? formal informal Names? given not given

Introduction, Objectives & Approach?

Brief. No proposals. Reactive to CCG, who do all the work. All you do is quote prices. So your 'team' is simply the laptop?

Communication of Changes? Nothing yet. CCG asks for it. Can you build this into a proposal? Can you try to get more GS? More PHA? Nothing yet. And this never comes. No attempts to develop anything. At all.

Negotiating skills - signalling, proposing, listening, clarifying, trading, persuading

Some confusion over whether you can do PHA - can you?

Your pricing approach at the end is confusing → stop subsidising!

"Expand further" - you need to make a proposal.

No attempt to get HuddleTech, yet. "No" - no explanation given.

Your expansion of GS is confusing. What situation is best for you, and what offers the best value to the CCG? You say nothing on this.

You risk not getting a full new word? You can't open a new GS

Dealing with time or conflict

Can you embrace the new info? Answer: no

word and do PHA. You only have one spare word!

Teamwork and meeting skills

Only one involved and this is minimal - just quoting prices.

Use of model/data

Some confusion over GS prices - you don't help the CCG here at all.

You are difficult to get good information from.

Technical aspects of prices and/or services

1st: "open to increasing GM" ... propose something.

GM	2100	@	£ 1473
GS	3300	@	£ 1111
(PHA)	-	@	£

- no PHA? This never comes.

→ you never develop this ... in fact it gets worse.

→ CCG propose this, not you.

2nd:

GM	2100	@	£
GS	3400	@	£ 1088
(PHA)	-	@	£

GM	2300	@	£
GS	-	@	£
(PHA)	-	@	£

→ Now this increases ... again the CCG offer this, not you.

[2nd] "word swap" - but you suggest fewer GM ...?

This is a bad idea. You should push for more GM not less.

And now you risk losing PHA. Your pricing approach is bad.

General

Reactive. No ideas, persuasion or proposals from you. You rely on the CCG to drive this forward. You need more energy and some proposals. Passive. Pricing is confusing and dense - do you even know?
